

Algorithm Engineering

Exercise No. 1

Tuesday 21st October, 2014

Submission

- (1) Submit your solution with `$ git request-pull` (or similar) to jkm@informatik.uni-jena.de.

1 Familiarize yourself with git

Find yourself a little tutorial about git. Read and make sure you understand its basic concepts and how to use it. Install the necessary tools.

2 Add, commit, etc. and push

Clone the git repository at <http://ci.inf-i2.uni-jena.de:81/wordcloud.git/>.

Make a change to your locally cloned repository. Add your changes and commit them. Next change something else and look at the difference and status of your changes. Add and commit them again.

Request a pull of your changes via email to jkm@informatik.uni-jena.de. Make sure I can access your pushed changes. There are several options: use an existing services like [GitHub](#), [Gitorious](#) or <http://repo.or.cz/> or use a repository on a pool machine.
